

Freedom of Information (FOI) Request / Research Questions

Introduction

I am requesting data through a freedom of information (FOI) request and collecting data required for the project through the questionnaire below.

Background

In 2015, the Government amended Approved Document Part M (Access to and Use of Buildings) to include a mandatory category (M4(1)) and two optional categories (M4(2)) & M4(3)). This study focuses on the local councils' proportion of new-build dwellings since 2015 and establishes to which Approved Document Part M standard the dwellings are built.

Key Terms

Building Regulations set minimum access requirements for all new buildings. These standards are explained by legislative guidance in Approved Document M. There are 3 Categories for Part M described below.

Category 1 - M4(1)- Basic standards for all new homes relating to accessibility for all new dwellings.

Category 2 - M4(2)- Accessible and Adaptable Homes - sets a greater requirement for dwellings to be more easily adaptable over time. Replaces the Lifetime Homes Standards.

Category 3 - M4(3)- Wheelchair User Dwellings - sets the highest standard to make a dwelling easier to adapt to be fully wheelchair accessible. Replaces the Wheelchair Housing Standards.
